## Midterm Rules and Logistics

The midterm is organized as follows:

- The midterm is held on Sakai under test and assignments.
- You will have 3 consecutive hours to work on the exam and upload your solutions.
- The timer begins immediately after you open the quiz: Do not open it before you intend to take the exam.
- You may begin any time after June 05 12:00 AM (EST), and you must **complete it by noon June 6 EST**, regardless on when you started the exam. Example: you start working on it 10:00 am on Saturday. Because the deadline is in 2 hours, you only get 2 hours to work on it (instead of the usual 3) It is under no circumstances beneficial to you to start the exam after June 06 9:00 am.
- The submissions must be done in Sakai. Please leave yourself enough time to upload your solutions, the time it takes to do this is already factored in the 3 hours time limit.
- The exam is an open notes open book exam, meaning you can consult your notes and the course books (Pitman/Durrett). You may use a calculator, R or such to evaluate complicated expressions, but you are not allowed to search the internet or ask anyone about the problems. you will be given a table that contains all the numbers you might need.
- **You are not allowed to talk about the midterm to anyone during the 36 time window, including posting on Piazza. You are also not allowed to search the internet nor library during the exam.**
- No class meetings will be held during the exam time.
- You can give fractions as fractions, simplified as much as possible. Give any numeric answers with 3 digits.
- Please upload your solutions as a pdf. Start each problem on a new page, and clearly indicate which problem you are answering.
- If you have any technical problems during the exam, send me an email immediately and cc all of the TA's.
